

# **M&S Review Criteria for ICD/CDD/CPD/ORD**

**As appropriate\*, DAMO-SB asks the following questions, as a minimum, when reviewing Joint Capabilities and Integration Development System (JCIDS) and Operational Requirements Documents (ORD) documents:**

- Will simulators & simulations be High Level Architecture (HLA) compliant?**
- Will standard, accurate data & models of the system(s) be developed for use in current & future simulations such as OneSAF & WARSIM?**
- Will training aids, devices, simulators & simulations be fielded concurrently with system(s)?**
- Will the system(s) use geospatial data from a National System for Geospatial Intelligence (NSGI) data provider, to include but not limited to the National Geospatial Intelligence Agency (NGA)?**
- Will the system(s) use data formats IAW requirements established in the Joint Technical Architecture & NSGI National Center for Geospatial Intelligence Standards?**
- Will the system(s) be compliant with the Common Operating Environment or Network Centric Enterprise Services in relationship to geospatial data, specific to **Little Command, Simulation and Experimentation**?**
